

ACCELERATE

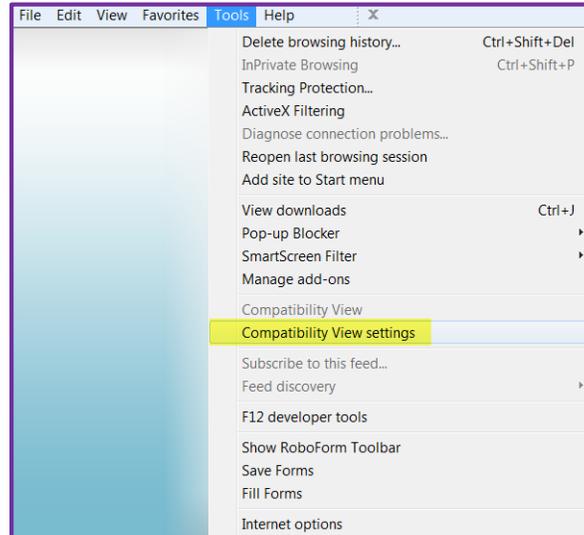

Internet Explorer Compatibility Fix

ACCELERATE

You may experience issues with Accelerate if you are using Internet Explorer 11 or higher. If so, go to the Internet Explorer "Tools" tab and select "Compatibility View settings."

Next, in the "Compatibility View settings" window, add the website domain accelca.com (exactly as shown here, do not include "www" or any other information before accelca.com). Click the Close button to finish.
