Rancho Cucamonga Municipal Utility **ELECTRIC VEHICLE** **COMMERCIAL CHARGER** **REBATE APPLICATION**

The City of Rancho Cucamonga Municipal Utility (RCMU) is offering the Electric Vehicle (EV) Charger Commercial Rebate Program to encourage commercial customers to expand the network of charging stations and support EV charging throughout the city.

For RCMU commercial customers, the EV Commercial Charger Rebate Program offers a rebate of up to \$5,000 to offset the cost and installation of a qualifying Level 2 (240-volt) or DC Fast charger(s) for use by their employees, tenants or the general public.

Please confirm your eligibility by reviewing the Terms and Conditions listed inside this application. Once you have confirmed eligibility, complete all sections of this application where indicated.

Send the required documentation along with the completed application to: RCMU.Customer@CityofRC.us or to:

*Rancho Cucamonga Municipal Utility EV Program
P.O. Box 4499
Rancho Cucamonga, CA 91729-4499*

FACT SHEET

The City of Rancho Cucamonga Municipal Utility (RCMU) has established a commercial electric vehicle (EV) charger rebate program to expand the availability of EV charging stations in RCMU's service area. This program offers incentives of \$4,000 and \$1,000 for an additional port for a Level 2 Charger AND/OR \$5,000 for a DC Fast Charger to RCMU's commercial customers who purchase and install a qualified, workplace or public EV charger. We are supporting the growing market for electric vehicles and expanding Rancho Cucamonga's efforts as an EV-friendly City for residents and visitors.

The program is designed to encourage installation of EV charging stations at shopping centers, municipal buildings, businesses for their employees and visitors, and multi-family housing for their tenants. The incentive is intended to offset the majority of costs related to the purchase and installation of EV chargers and accelerate availability in RCMU's service area. EV charging stations will be served using a portion of clean renewable energy (solar/wind), providing an excellent opportunity for clean electricity EV charging in the region.

COMMERCIAL EV PROGRAM CRITERIA AND INCENTIVE AMOUNT

Rebates are available to commercial RCMU customers for costs incurred on newly purchased EV charger(s). Chargers must be purchased between July 1, 2019 and June 30, 2021. Customers can receive \$4,000 and \$1,000 for an additional port for a Level 2 Charger AND/OR \$5,000 for a DC Fast Charger for each hardwired EV charger installed.

One Level 2 (240-volt) EV charger or DC Fast Charger rebate is available for each commercial customer that has a minimum of 5 parking spaces available to employees, customers, visitors, or tenants. One additional Level 2 charger rebate is available for every 10 additional parking spaces at the same location, business, or property. A maximum of 2 EV charger rebates are available per business location or multi-residential property with a total rebate of \$10,000.

This program expires June 30, 2021. Rebate Terms and Conditions may be modified without prior notice and the Rebate Program may be terminated when the program goals are met, or funds are exhausted, whichever comes first. Applications are accepted on a first-come, first-served basis. Funds are limited and rebates are not guaranteed.

CUSTOMER SUPPORT

Customer Service Representatives are available to answer any questions regarding the Commercial EV Charging Program. Call us at (909) 919-2612 or email us at RCMU.Customer@CityofRC.us.

Frequently Asked Questions

WHAT IS THE COMMERCIAL EV CHARGER PROGRAM?

The Commercial EV Charger Program is Rancho Cucamonga's new Electric Vehicle (EV) charger rebate program, which offers rebates to commercial RCMU customers for expenses incurred for the purchase and installation of EV chargers for use by their employees, customers, visitors, or tenants.

The program is designed to encourage the installation of convenient charging stations at public places, municipal buildings, businesses, and apartment dwellings. RCMU is supporting the growing EV market and helping to provide a convenient and reliable network of charging stations for residents and visitors.

HOW DO I QUALIFY FOR A REBATE?

The commercial or multi-residential property must have at least 5 parking spaces available to employees, public, or tenants. The charger must be permanently installed at your business or multi-residential property within the RCMU service area.

To apply for the rebate, you must submit a completed Commercial EV Charger Rebate Application along with the required documents no later than six months after the EV Charger installation has been completed.

I AM AN SCE CUSTOMER IN RANCHO CUCAMONGA, DO I QUALIFY FOR THIS REBATE?

No, SCE customers do not qualify for this rebate, but can go to www.sce.com/EV4Business for more information.

HOW MUCH IS THE REBATE?

Rebates are available to compensate commercial RCMU customers for costs incurred on the purchase and installation of the EV charger(s). Eligible customers can receive up to \$4,000 and \$1,000 for an additional port for a Level 2 Charger AND/OR \$5,000 for a DC Fast Charger for each hardwired wall- or pedestal-mounted EV charger.

One Level 2 (240-volt) EV charger or DC Fast Charger rebate is available for a minimum of 5 parking spaces available to employees, visitors, or tenants. One additional Level 2 charger rebate is available for every 10 additional parking spaces at the same location, business, or property. A maximum of 6 EV charger rebates are available per location. EV charger rebates are available on a first-come, first served basis until funds are depleted, or June 30, 2021, whichever comes first.

DO I NEED A SPECIAL METER?

EV chargers need to have a dedicated RCMU revenue-grade meter(s) in order to qualify for the rebate. Your licensed contractor will need to install an RCMU-approved meter socket(s). RCMU will install the meter(s) only.

WHAT TYPES OF CHARGERS QUALIFY FOR THE REBATE?

Rebates will only be provided for qualifying wall-mounted or pedestal Level 2 (240-volt) chargers with the SAE J1772 charging plug and DC Fast Chargers with CCS/SSE, or CHAdeMO charging plug. The charger must be UL (Underwriters Laboratories, Inc.) listed, ETL Listed, or approved by the Rancho Cucamonga Department of Building and Safety and installed by a licensed contractor in compliance with local codes, permitting, and inspection requirements. *A specific brand of charger is not required.*

Prices and features of electric vehicle chargers vary, and many EV charger installers will offer to handle the rebate paperwork for you. Some charger installers may have incentive money from other sources. These incentives will reduce the out-of-pocket costs of installing a charger. It is your decision which charger to install to best fit your needs.

WHO WILL INSTALL MY EV CHARGER?

As the customer, you arrange for a licensed contractor to install the EV charger in compliance with local codes, permitting and inspection requirements. The EV manufacturer or vendor will often help arrange for installation. *RCMU will not install the EV charger units.*

WHAT RATE WILL BE USED FOR EV CHARGING?

EV chargers will have a specific tariff that incorporates the time of use for the electricity consumed and will be provided from a portion of RCMU clean power sources, including solar and wind power – effectively making an ideal switch from fossil fuels to clean powered vehicles.

HOW LONG WILL IT TAKE TO GET A PERMIT FOR CHARGER INSTALLATION?

Permit approval will depend on the regulatory agency (state, county, and/or city) and the required upgrades or electrical configuration of the property. Contact the designated regulatory agency for your property or business. For your convenience, the Rancho Cucamonga Building and Safety Services Department has online permit information at <https://aca.accela.com/cityofrc/>

HOW DO I APPLY FOR THE REBATE?

Visit www.CityofRC.us and then go to RCMU to download the Commercial EV Charger rebate application. Please read the program requirements and the Terms and Conditions before you purchase and install the EV Charger(s). Purchase and install the qualifying Level 2 charger(s). Complete the rebate application within six months of the EV Charger installation and email it along with the required documentation to: RCMU.Customer@CityofRC.us

HOW TO APPLY

1. Confirm eligibility by reviewing the Terms and Conditions below.
2. Purchase eligible EV Charger(s) and retain all receipts.
3. Install the eligible EV Charger(s) and retain all receipts.
4. Complete all sections of the application, and sign and date in in the applicable sections.
5. Submit the completed application and required documentation via email or postal mail.

Send the application and required documentation to:

Email: RCMU.Customer@CityofRC.us (preferred method) or

Rancho Cucamonga Municipal Utility EV Program
P.O. Box 4499
Rancho Cucamonga, CA 91729-4499

Rebate applications must be received within six months of the EV charger purchase. The application must be submitted no later than June 30, 2021. For your records, please make a copy of your application packet including all required documentation.

Terms and Conditions

By submitting this RCMU EV Rebate Application, I agree, understand and have met the following Terms and Conditions (T&C):

The RCMU Electric Vehicle (EV) Commercial Charger Commercial Rebate Program, (Herein after referred to as "Program") provides rebates to assist RCMU commercial customers with the purchase and installation costs of qualifying EV charger(s). The Program begins on July 1, 2019 and expires June 30, 2021. The Program may be modified without prior notice and can be terminated when the program goals are met, or funds are exhausted; whichever comes first. Funds are limited and rebates are not guaranteed.

Applications are accepted on a first-come, first-served basis and processed in the order received.

The maximum rebate offered for the purchase and installation of a qualifying Level 2 (240-volt) EV charger is \$4,000 per charger and \$1,000 for an additional port for a total \$5,000 for a dual port Level 2 EV charging station AND/OR a DC Fast Charger is \$5,000 per charger. The rebate amount will be determined based on the documentation provided for each qualifying charging station. All costs incurred for the purchase and installation of EV chargers are the responsibility of the buyer. EV Chargers may be owned by either the RCMU customer or third parties. The rebates will be provided to the RCMU customer only; however, the customer has the option to assign their rebate to a third party. Electrical power for the chargers must be provided by RCMU.

One Level 2 or DC Fast Charger EV charger rebate is available for a commercial customer that has a minimum of 5 parking spaces available to employees, customers, visitors, and tenants. One additional Level 2 charger rebate is available for every 10 additional parking spaces. A maximum of 2 EV charger rebates is available per premises. Premises are defined as an integrated land area including improvements thereon, undivided by public thoroughfares or railroads and where all parts of the Premises are operated under the same management for the same purpose. Indications of the "Same Management" include, but are not limited to, common access, parking, lighting, landscaping, and combined maintenance of common areas. A single premise may consist of several lots, properties and/or joint/multiple owners and/or several businesses.

Level 2 (240-volt) or DC Fast charger must be new. Resale units, rebuilt, rented, received from warranty insurance claims, won as a prize, or new parts installed in existing units do not qualify. Chargers(s) must utilize the SAE J1772, CCS/SSE, or CHAdeMO charging plug and must be UL listed (certified by Underwriters Laboratories Inc.), ETL listed, or approved by the Rancho Cucamonga Building and Safety Services Department. The wall or pedestal mounted qualifying EV charger must be installed by a licensed contractor and must be hardwired to the building structure at the corresponding RCMU electric service address. Energy for the EV chargers shall be measured through an RCMU installed dedicated revenue meter(s). Customer shall provide a meter socket(s) to accommodate the RCMU meter(s) per RCMU Electric Service Requirements. RCMU will install the meter(s) in the

customer provided metering socket(s) at no cost when approved for service. Customer shall design the installation to minimize the number of meters to accommodate the most number of EV chargers as practical.

The application must be completed by the RCMU commercial customer and must be signed, and submitted by an authorized representative. Rebate applications and required documents must be postmarked no later than June 30, 2021 and must be submitted by mail six months of the EV charger purchase date. Applications received by RCMU with missing documentation or that do not meet the program criteria will not be considered for payment. RCMU is not responsible for documents lost or destroyed in the mail via transit. Submitted rebate application and accompanying documents become the property of RCMU. Additional documentation to verify that the business entity meets the criteria for the Program eligibility may be requested. RCMU has latitude regarding interpretation of the documentation.

The EV charger(s) must be accessible to employees, customers, visitors and tenants to charge EVs approved for highway application by the U.S. Department of Transportation. The EV charger(s) primary use shall not be used to charge golf carts, neighborhood carts, motorcycles, and electric scooters.

Program participants must be in compliance with all State, County, City governments (including City of Rancho Cucamonga Building and Safety Services Department, property owner, and/or homeowner association requirements regarding local conditions, restrictions, codes, rules and regulations. All permits necessary regarding the installation of EV chargers, metering equipment, or any other support equipment required or necessary for the proper and safe installation of the EV must be obtained prior to submittal of the rebate application. In addition, the Program participant is solely responsible for the adherence to all applicable conditions, covenants, and restrictions imposed by the aforementioned persons or organizations. All permits necessary must be obtained prior to the EV charger(s) installation(s). The sign-off date must be on or before program expiration/termination date.

RCMU reserves the right to inspect the EV charger installation at any time with reasonable notice. The Program participant must agree to provide RCMU's representative reasonable access to the installation location during normal business hours. Any refusal by the Program Participant to allow reasonable access to the EV charger installation site for the purpose of inspection by an authorized RCMU representative may result in forfeiture of the rebate. The EV charger(s) is/are to remain in service at the location specified on the rebate application for a minimum of one year or the RCMU electric service account is closed. Failure to adhere to the one year service requirement, or found not to be in compliance with T&C will be billed for the amount of the rebate.

RCMU makes no warranty and is not responsible for any representations, whether expressed or implied, included but not limited to the warranty of merchantability, fitness, performance, and longevity for any particular purpose, use, or application of the item(s) or measure(s), manufacturers, dealers, contractors, or any other third parties, materials, workmanship, the quality, safety and/or installation of the item(s) or measure(s), effects on pollutants or any other matter

with respect to the Program. Moreover, RCMU shall not be responsible for the workmanship including quality of installation, or the installer's failure to comply with applicable safety standards as it relates to the installed equipment.

As part of acceptance of this rebate, RCMU may utilize data generated by the use of the electric vehicle charger to improve RCMU services, conduct studies, and any other purposes in furtherance of RCMU's operations. Such data may also be provided to other entities for research and grant purposes and/or

as required by law. Additionally, RCMU retains the right to generate and own Low Carbon Fuel Standard Credits for electricity provided to any chargers installed under this program.

Implementation and interpretation of the Terms and Conditions of this Program are at the sole discretion of the RCMU.

Please allow up to two months after application submittal to receive the rebate.
