## COMMERCIAL REBATE APPLICATION

The Rancho Cucamonga Municipal Utility (RCMU) is committed to helping our commercial customers conserve energy through a variety of rebates and incentive programs. Saving energy helps the environment and the bottom line of your business. A free, comprehensive energy audit is recommended to be performed before investing any large amount of money in energy efficiency improvements. To schedule your free energy audit, please call Synergy Companies at 1-800-818-4298. Commercial rebates require pre-approval by submitting this document. Once the application is approved, equipment should be purchased and installed. To finalize the rebate, submit the supporting documentation.

### RCMU CUSTOMER INFORMATION

## GRAND TOTAL FOR ALL REBATES

\*Additional rebates may be available through Southern California Gas Company at [SoCalGas.com](http://SoCalGas.com) and Cucamonga Valley Water District (CVWD) at [CVWDwater.com](http://CVWDwater.com).

# TERMS AND CONDITIONS

1. Pre-approval from RCMU is required prior to work being completed to verify rebate eligibility.
2. All energy efficiency rebate applicants are subject to random pre and post-installation inspections. The customer agrees to fully cooperate with any authorized agents of RCMU. Customers who are found to not be in compliance with the Terms and Conditions will be billed for the amount of the rebate.
3. Rebates are available to all active customers of RCMU in all rate classes who are in good standing.
4. Proof of Purchase must be submitted with a rebate application, clearly showing the following information with regards to items installed: manufacturer, model number, quantity, and purchase price.
5. All equipment installed must be new (not used, refurbished, or available for resale); used at the service address listed in the rebate application; nor replacing existing less efficient equipment.
6. Rebate frequency: A customer may only receive a rebate for the same product at the frequency indicated in the charts for this section or program description language.
7. Customer agrees to use the equipment for its useful life or 5 years as a RCMU customer, whichever is less. By participating in the rebate program, the customer agrees to continue using the incentivized equipment for the service life of the product (as per the manufacturer's recommendations) or for five years, whichever is less. If the customer does not comply with this requirement, RCMU has the right to seek a refund for a prorated amount of the original incentive initially paid to the customer. If for any reason the customer ceases to be an RCMU customer or adds self-generation capacity, the customer will be billed on a pro-rated basis for the rebate.
8. Customer may not receive multiple rebates for the same equipment from RCMU but may receive additional non-RCMU rebates on the same equipment, if eligible.
9. Rebate will not exceed the cost of the purchased equipment. Labor, installation, taxes, and delivery charges are not eligible expenses for rebates.
10. Energy savings will be verified through metered usage. Customers whose metered usage does not conform with the estimated energy savings listed in the application are subject to a post-installation inspection. Customers found not to be in compliance with the Terms and Conditions of this rebate program, or to have provided false or inaccurate information in this application will be billed for a prorated amount of the rebate, or full amount of the rebate, if appropriate.
11. NEM customers: Net energy metered (self-generating) customers' rebate amount will be determined by the percentage of their total energy usage that is not offset by their photovoltaic system. For example, if only 25% of a NEM customer's energy is supplied by RCMU then their incentive is reduced to 25% of the rebate amount listed on the application.
12. RCMU reserves the right to modify this program at any time without notice. Funds are limited. Rebate applications over \$5,000 may not be fully funded.
13. RCMU assumes no liability for any equipment or improvements installed.
14. One rebate application must be filled out for each meter/account number.
15. A signed W-9 is required if assigned to a contractor or third-party representative.
16. Please allow up to 4 weeks for RCMU to process the rebate application.
17. For Lighting Replacement and De-lamping, rebate amount cannot exceed 25% of the total project cost.
