

ROOTED in RC Fast Facts

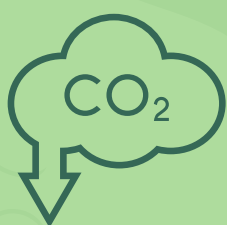

TREE INVENTORY

The City Urban Forestry Crew manages over 72,000 trees and counting!

SPECIES DIVERSITY

RC is home to over 230 different species of trees.

AIR POLLUTION MITIGATION

Trees sequester carbon and other greenhouse gases and in turn produce oxygen.

OXYGEN PRODUCTION

A mature tree can provide enough oxygen for four people to breathe for one day!

TREES AND MENTAL HEALTH

Studies have shown spending time around trees can reduce stress, lower blood pressure, and increase focus and mood!

URBAN HEAT ISLAND EFFECT

Trees reduce the urban heat island effect (when urbanized areas experience higher temperatures than outlying areas).

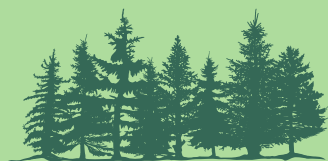

MULCHING

When possible, the City Urban Forestry Crew will create mulch from downed trees for use in other projects!

COST OF WATERING

On average, it costs less than \$3 to water a newly planted tree per year!

VEGETATION DIVERSITY

The Inland Empire is one of the top 5 areas worldwide for vegetation species diversity.
